Yang, Jae-Hyun (KR-INHA)
The method of orbits for real Lie groups. (English summary)
Kyungpook Math. J. **42** (2002), *no. 2,* 199–272.

This paper presents a brief survey of some very well-known aspects of the orbit method for real Lie groups. Some explicit details for the Heisenberg and Jacobi groups are included. *Peter E. Trapa*
